

Fence Type : Pedestrian Gate

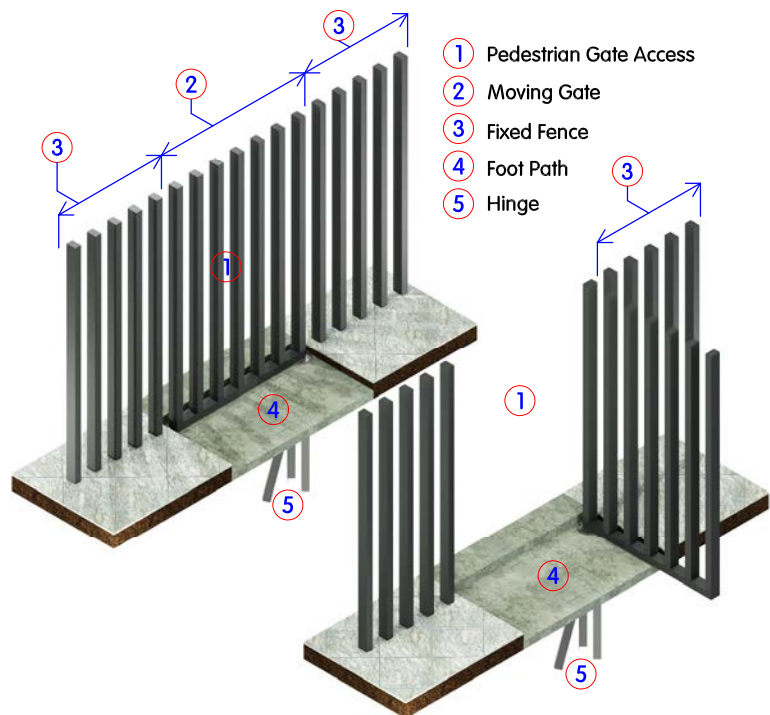

Fence Style : Post / Picket

Fence Material Options :
Galvanized Steel
Stainless Steel
Aluminium

Fence Finish : Powder Coat

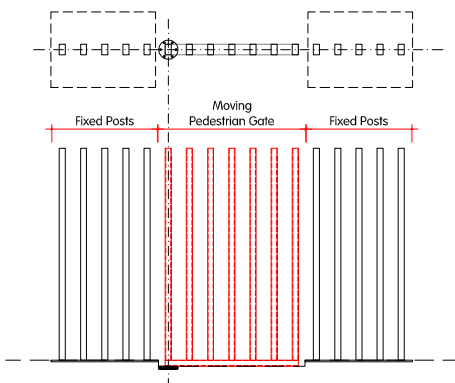

Drive Unit : Manual Pivot Hinge

Brief Description : The Fancy Fence pedestrian access gate does not have standard hinges. The gate swings open around one of the posts/pickets at the end of the gate. This is possible because a horizontal beam is used to connect the gate posts/pickets together. This beam is placed slightly below pavement level to obtain the effect of an invisible gate that is merged into the rest of the fence. Naturally, if you want to make your pedestrian access gate stand out from the rest of the fence there is a wide range of materials and colours available for you.

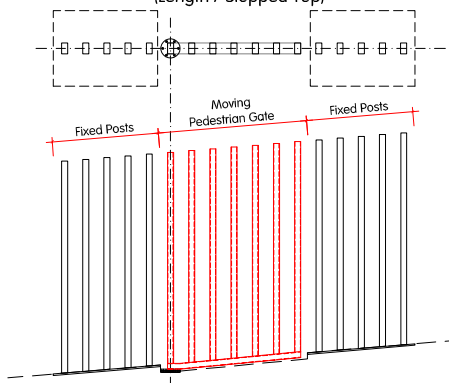

- ① Pedestrian Gate Access
- ② Moving Gate
- ③ Fixed Fence
- ④ Foot Path
- ⑤ Hinge
