

ABOUT FANCY FENCE

We are the inventors of the FANCY FENCE system — a groundbreaking solution combining security, aesthetics and discretion. Since 2013, we have been designing, manufacturing and installing our systems worldwide. Our products seamlessly integrate into both private residences and the most prestigious public spaces, meeting the highest standards of design and performance.

WHY

FANCY FENCE

STURDY

RETRACTABLE

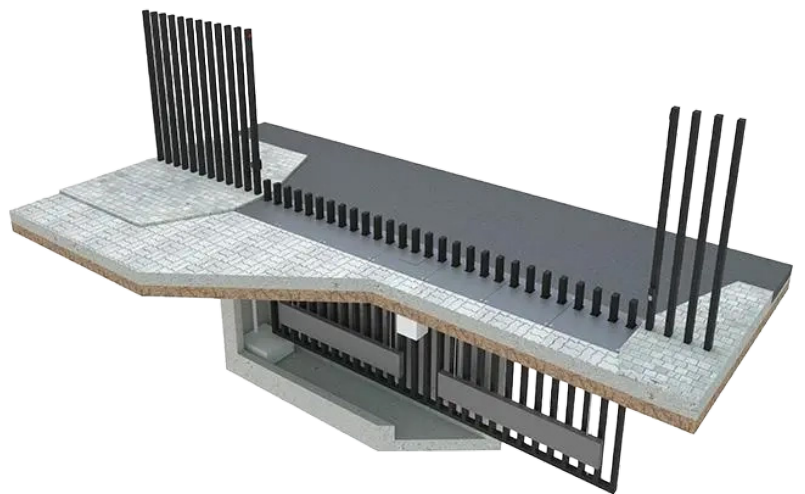

WEATHER PROOF

SHOWSTOPPER

Why buy Fancy Fence? Fancy Fence is the world's first fully retractable fence. It retracts fully into the ground, keeping your entrance clean, secure, and modern. It's low-maintenance, weather-resistant, and a total showstopper—both in form and function.

There when you need it, gone when you don't.

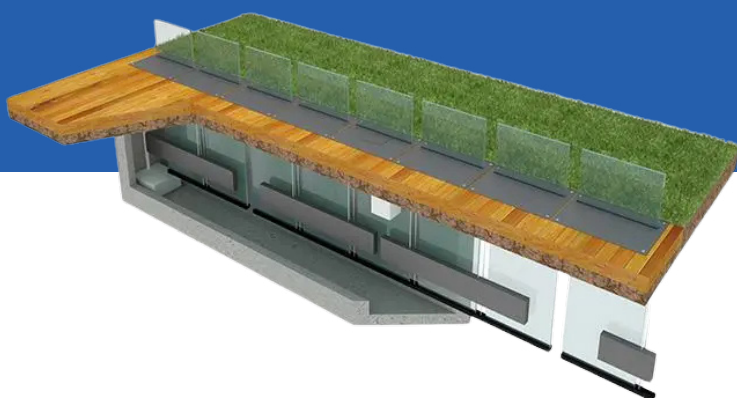

HOW IT WORKS

FANCY FENCE system combines modernity, functionality and reliability.

The main element is the gate bay, which is lowered into the ground by means of a built-in drive and becomes invisible when not in use.

The gate is placed in a concrete basin ensuring the stability and durability of the system.

Thanks to the modular design, the gates can be combined to create fences of different lengths.

The system is equipped with:

- A drainage pump to protect the mechanism from flooding,
- Modern safety sensors such as photocells and overload sensors,
- Removable covers and a manual mode cover.

USES FOR FANCY FENCE

PRIVACY

Fancy Fence is the perfect solution for creating secure, private outdoor spaces. With its seamless design and premium materials, it not only protects but also enhances the visual appeal of any property.

RESIDENTIAL

Ideal for homes and residential estates, Fancy Fence adds modern elegance and curb appeal while delivering reliable security. It's where function meets architectural style.

PUBLIC SPACES

From hotels and resorts to shopping centres and civic areas, Fancy Fence transforms public spaces with a sleek, functional, and aesthetically striking boundary system. Built to impress and engineered to last.

SHAPES

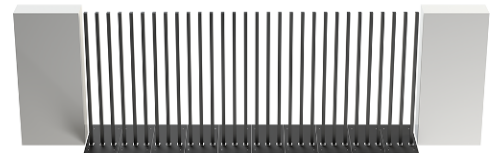

Fancy Fence's modular system allows you to create fence lines that are as unique as the property they protect.

Whether you need a sleek straight edge, a soft curve, or something more custom — we've got the shape for it.

AVAILABLE CONFIGURATIONS:

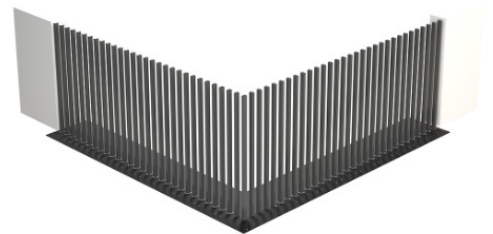

Straight Line

- Clean, modern, and minimal. Ideal for driveways, pathways, and property lines.

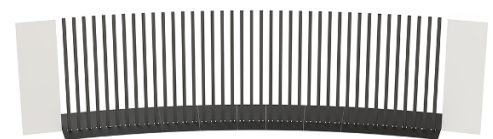

Arc / Curved Line

- A gentle curve for a softer, architectural look or to follow existing landscaping.

Custom Geometry

- Need something unique? Zig-zag, offset, or asymmetrical — our system adapts to your design.

STYLES

We give you the opportunity to create any fence composition you wish, using the available post dimensions.

In addition, depending on their individual preferences, the posts can be clad with various materials supplied by the customer, such as:

HPL BOARDS

QUARTZ SINTER PANELS

CORTEN SHEETS

STAINLESS STEEL/COPPER SHEETS

TOUGHENED GLASS

WOOD
